

## Supplementary

LLF can generalize to other datasets, e.g., cars (Fig. 17), cats (Fig. 18), horses (Fig. 19), and churches (Fig. 20) in LSUN.

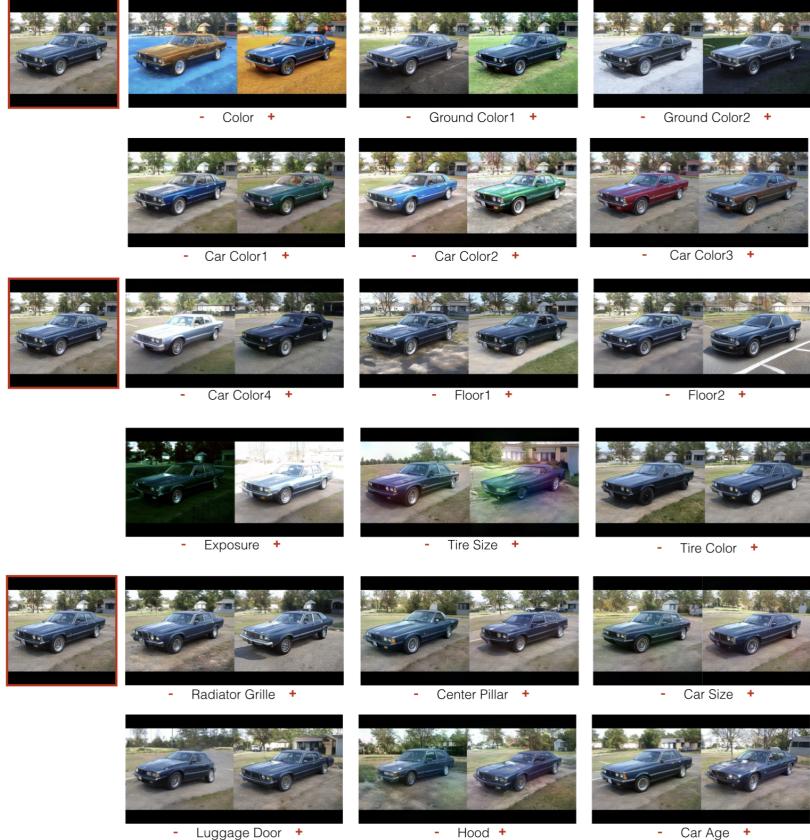

Figure 17: The results of StyleGAN2 on LSUN car ( $512 \times 512$ ), the first column shows three identical images from the LSUN car, which were resized from  $512 \times 384$  to  $512 \times 512$  to match the output size of StyleGAN2. Columns 2-7 showcase the morphed images via LLF.

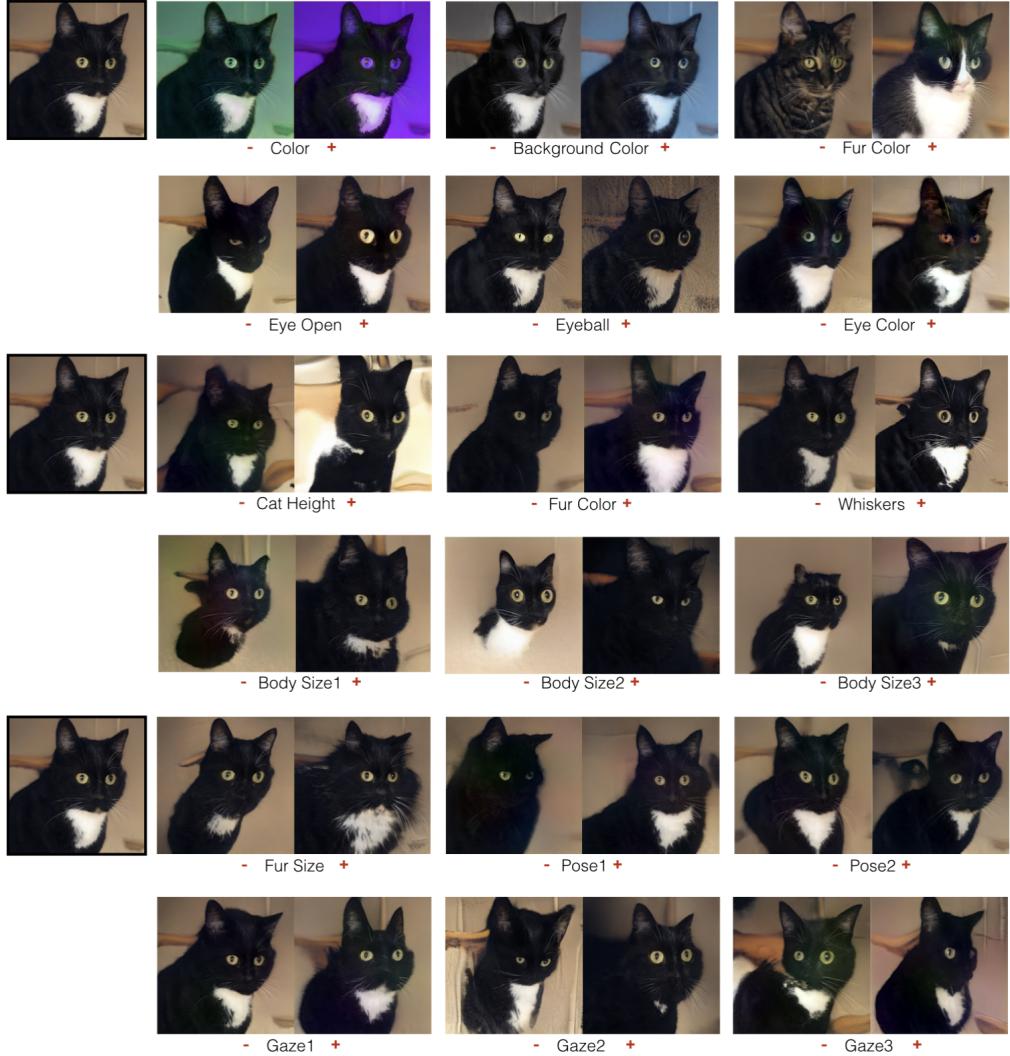

Figure 18: The results of StyleGAN2 LSUN cat (256×256).

Figure 19: The results of StyleGAN2 LSUN horse (256×256).

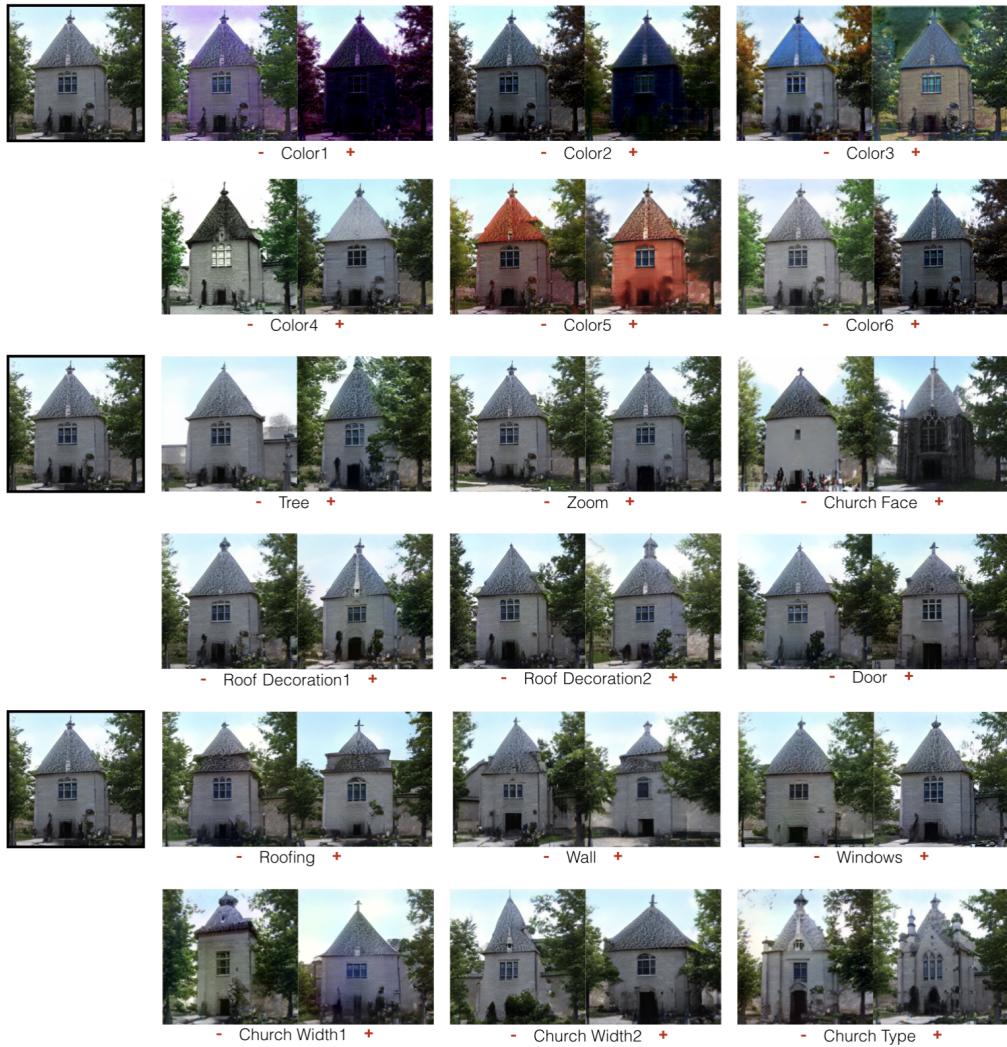

Figure 20: The results of StyleGAN2 LSUN church (256×256).
